The Qbox Solar have real-time visibility into the return on your solar panels. Via PC, tablet or smartphone.

Handy, because you can immediately monitor or your solar panels have optimal performance. On a daily, weekly, monthly, and yearly level

Anytime, anywhere via your PC, tablet or smartphone understanding of your income and expenses are? With Qurrent Insights & generation can. Through "My Energy" you can keep an eye on your panels or even perform optimally, or you generate more than consumed by day, week, month and year level.

## Operation:

The proceeds of the measured using a current meter placed in the cupboard. This kWh-meter is connected to the Qbox by means of the Y-cable.

Because the Qbox measures the output of your solar system using the current meter is any suitable solar system. The condition is that the panels are connected to one separate group in your cupboard.

## Electricity Meter:

It is possible with a smart meter or turntable to show generation and consumption "My Energy".

In a Ledmeter, it is unfortunately only possible to measure the generation.
