

Minimum work – high stability

IBC TopFix 200

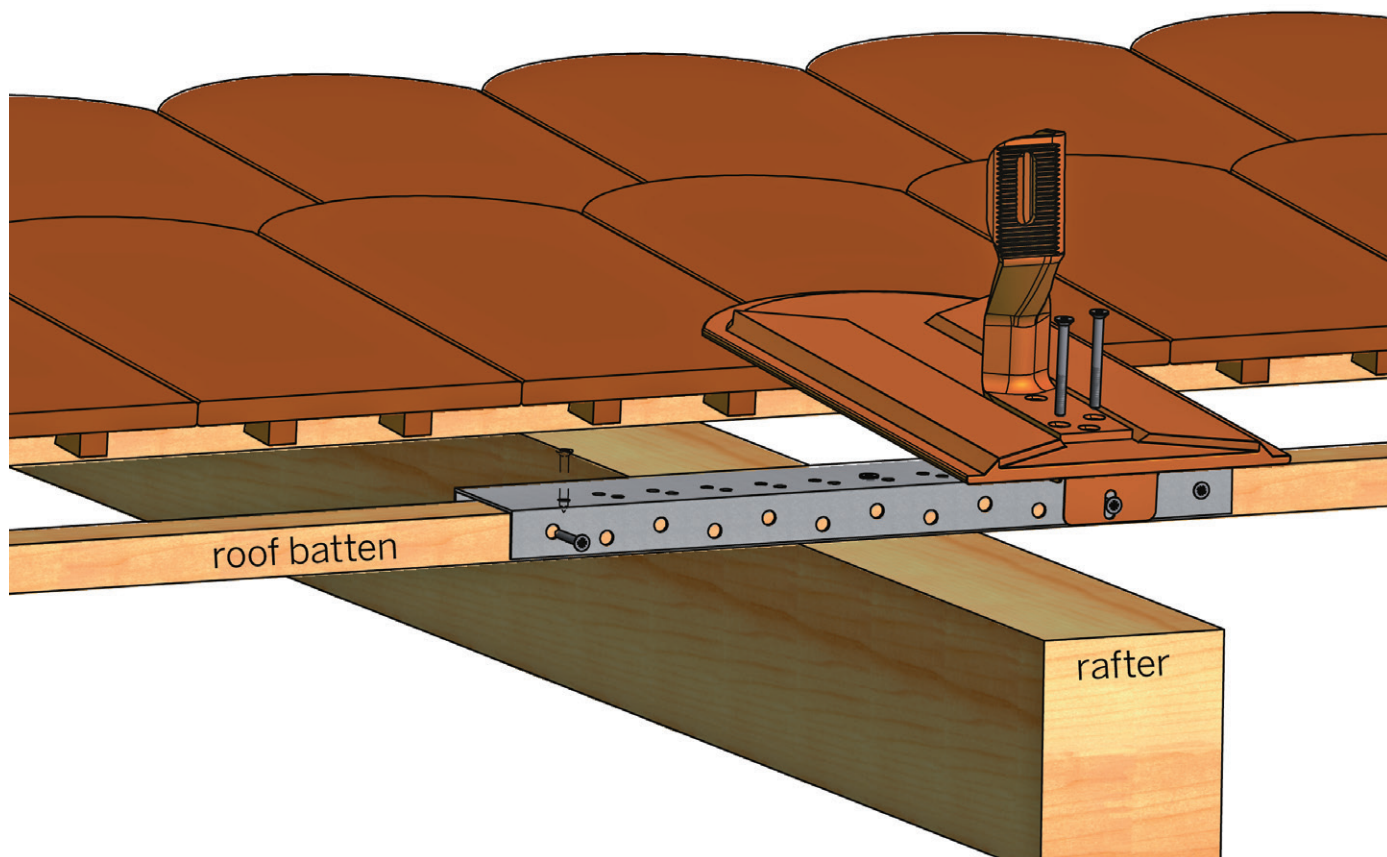

IBC roof hook “Mammut Form S+ Biber”

Broken tiles or other roof damages belong to the past with the IBC TopFix 200 roof hook “Mammut Form S+ Biber”. This roof hook distributes loads on its additional beam on the bottom side homogeneously among roof battens and rafters and consequently prevents damage to the roofing. Thanks to the combination of roof hooks and shaped tiles, only the existing roof tile needs to be replaced by “Mammut Form S+ Biber”. Carrier rails of the IBC TopFix 200 system can be used horizontally and vertically. The “Mammut Form S+ Biber” roof hook can be used for plain tiles with a width of 180 mm and is available in five different colors. Its safety aspect is also convincing: static tests confirmed its especially good suitability for regions with heavy snow and wind loads*.

*Static design using PV Manager is required.

Highlights:

- 10 year product warranty**
- Statically suitable for high snow and wind loads
- Suitable for horizontal and vertical installation
- Roof hook combined with profiled sheet roof
- Complete with 400 mm support beam including self-drilling screws for screwing to the roof structure
- Corrosion protection thanks to combination of hot-dip galvanized steel and powder coating
- Available in the colors chestnut brown, dark brown, brick red, anthracite and red brown
